Architecture

Paris workshop - May 2015

Dave Martin

Agenda

- Architectural overview
- Collectory
- Biocache
- Hubs
- Logger
- Cassandra
- SOLR and Lucene

Front End Apps

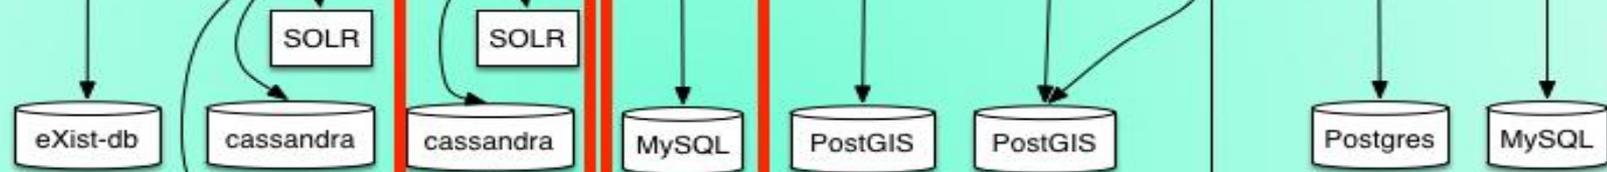

ALA Service Layer (logical) - XML/JSON/WMS services

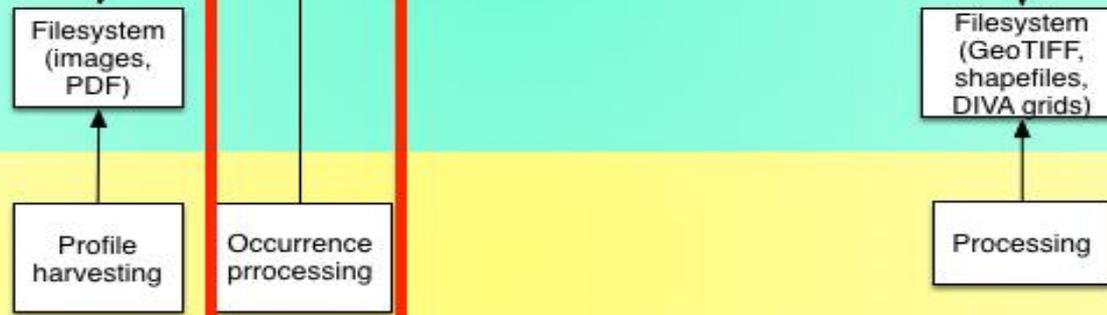

Web services

DBs, Indexes, Filesystem storage

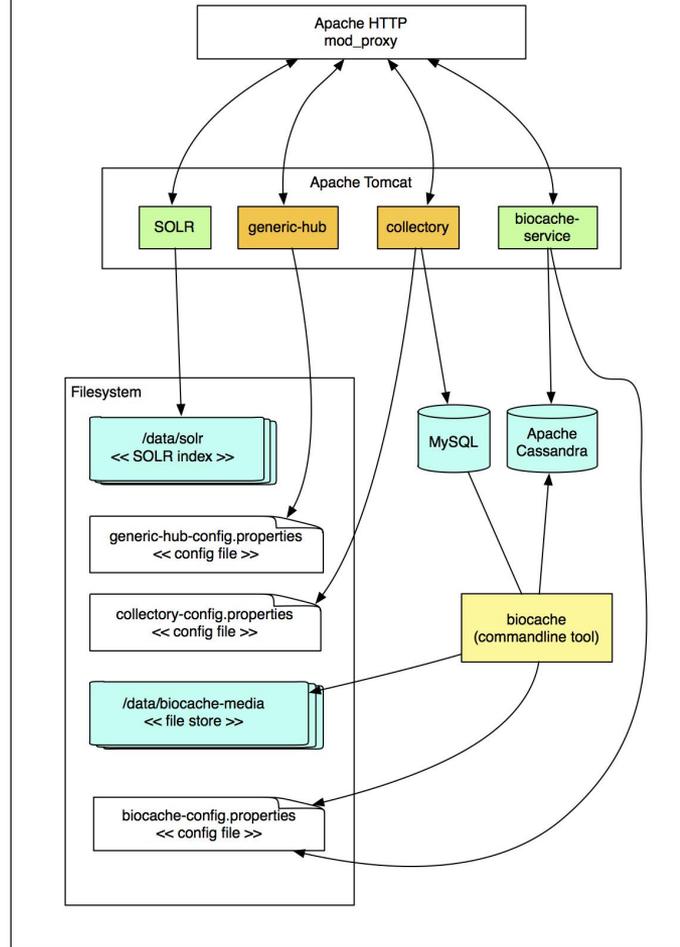

Offline processing

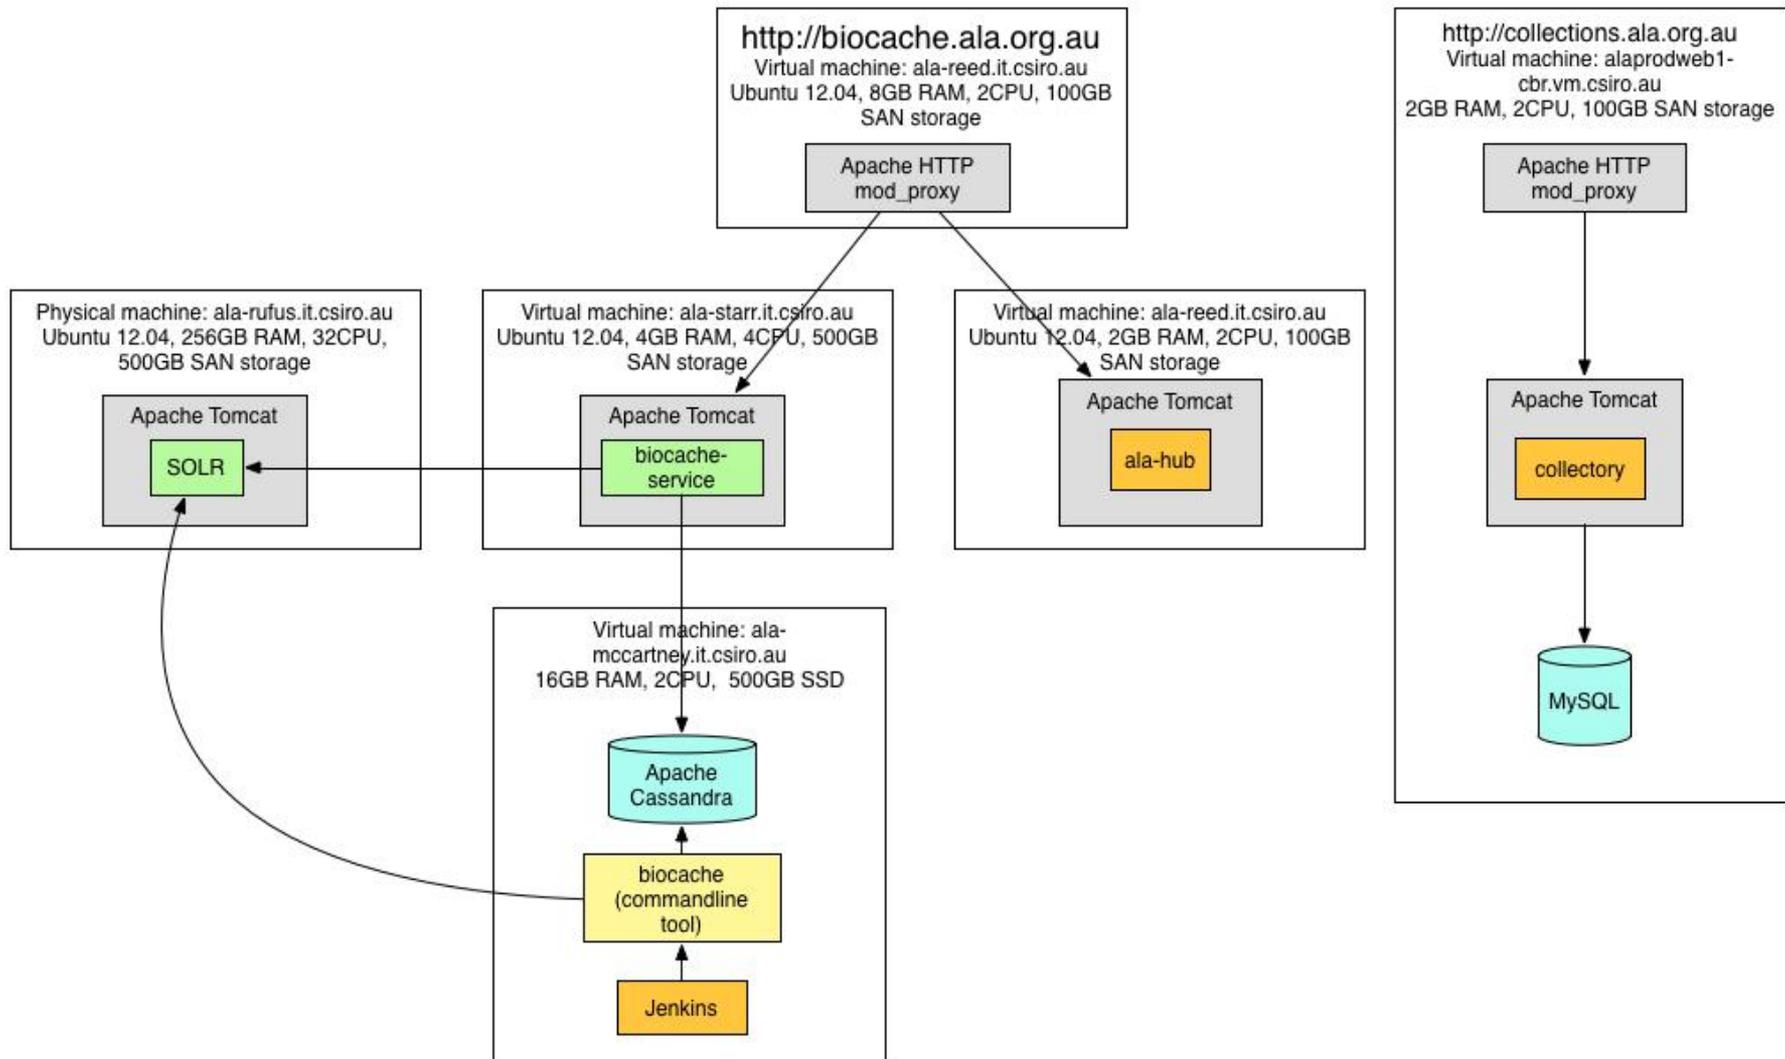

ALA Demo

- Focussing on subset of tools
 - Collectory
 - Biocache services
 - Biocache command line tool
 - Hubs

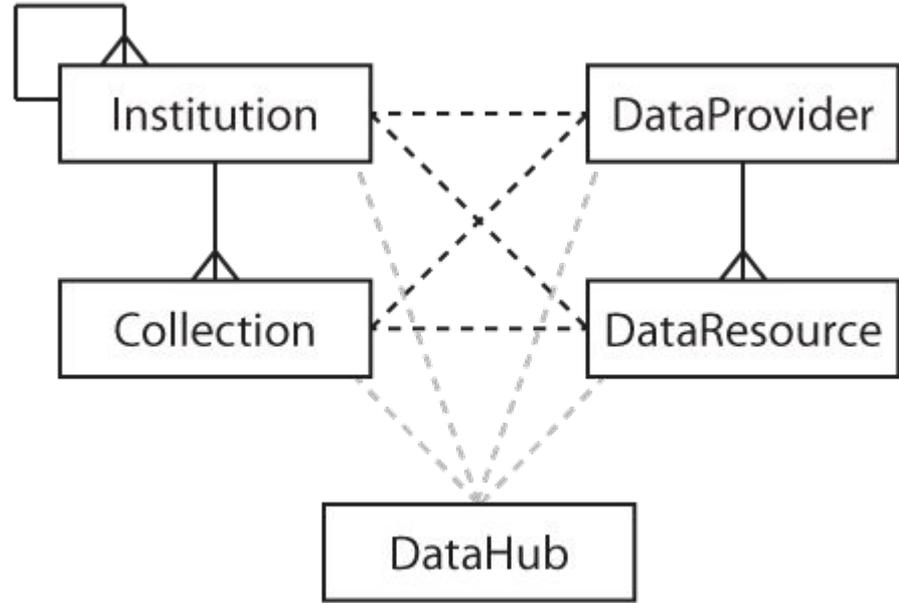

http://ala-demo.gbif.org
Virtual machine: ala-ono.it.csiro.au
Ubuntu 12.04, 16GB RAM, 4CPU, 500GB SAN storage

Collectory

- Data resources
- Collection
- Institution
- Data provider
- Data hub

Collectory - data mapping

Data resource 1

	A	B	C	D
1	ID	scientificName	collectionCode	institutionCode
2	1	Macropus rufus	MAM	AM
3	2	Macropus rufus	MAM	AM
4	3	Macropus greyi	MAM	AM
5	4	Macropus greyi	MAM	AM

Collection: Australian Museum Mammal Collection

Institution code: "AM"
Collection code: "MAM"

Data resource 2

	A	B	C	D
1	ID	scientificName	collectionCode	institutionCode
2	76	Macropus rufus	MAM	AM
3	79	Macropus greyi	MAM	AM
4				

Collectory

- Grails app
 - Grails plugin - collectory-plugin
 - Grails template app - generic-collectory
 - generic-collectory = the one to fork for your project
- MySQL database
- External configuration file

Biocache services

- Restful JSON
- Web Mapping Services (WMS)
- Downloads
- Java Spring MVC webapp

Biocache command line tool

- **Java executable**
 - Scala implementation
 - External configuration file
 - Vocabulary files
- **Loading, processing, sampling, indexing**
- **Other bits**
 - Duplicate detection
 - Outlier detection

Logging

- Download usage
 - Collection
 - Institution
 - Provider
- Webservices
- Collectory pages

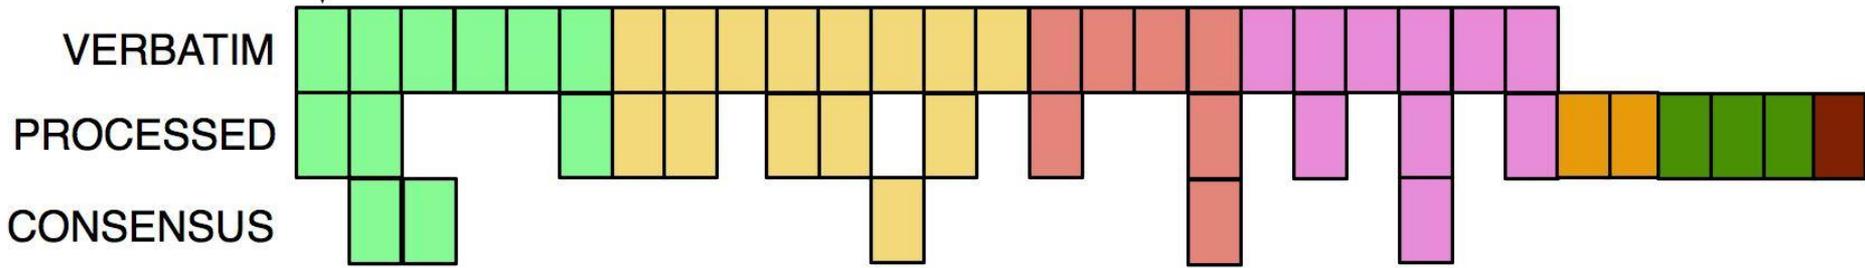

Hubs

- Occurrence searching & mapping
- Grails app
- Plugin Architecture
 - biocache-hubs = the plugin
 - generic-hub = the one to fork for your project
- Internationalisation support

Apache Cassandra

- Used for occurrence record storage
- NoSQL database
- Supports simple operations
 - Get by ID
 - Put by ID
 - Range query
- Extensible storage

Single field

Darwin core fields

HISPID fields

CABRI fields

OBIS extensions to darwin core

Custom attributes

Data Quality Assertions

Field Corrections

SOLR & Lucene

- Lucene index
 - name matching
 - generate from DWCA
- SOLR
 - occurrence searching
 - mapping
 - update live & offline creation
