Things done so far

• 2 instances of the ALA portal demo
• One of them with a modified taxonomic backbone
• Extended the biocache module to allow harvesting of BioCASe web services
Plans (tentative)

• 10 year project „Atlas lebendiges Deutschland“ that will include the occurrence portal

• Smaller side project with additional features for botanical specimens (multiple identifications, associations between specimens, annotation system, usage of German checklists)
Questions

• Integration of specific checklists
• Multiple or empty checklists?
• Images on image servers
• Plugging-in of other web services
